OBJECTIVE

A student from Kuala Lumpur Metropolitan University College seeking for a job in the software industry with the opportunity for growth. I have 3 months working experience as an intern at BizAid Technologies, I'm prepared to work enthusiastically and willing to learn new technologies to enrich my skill set whenever required.

EDUCATION

2013-2015

Diploma in Information Technology

- Cosmopoint International College of Technology
- CGPA: 3.96
- Dean List for every semester

2016-2018

BSc. (Hons) in Information Technology

- Kuala Lumpur Metropolitan University College
- CGPA: 3.85
- First Class Honors

My Work

2018

Infinity Portfolio – Web Developer

- Developed a web-site builder and templates for this company.
- Integrated BillPlz Payment Gateway API
- Build a custom API to populate user data
- Integrated Freenom Domain Reseller API for checking domain availability.

2018

BizAid Technologies – Programmer(Intern)

- Build a specialized web browser for filling SSM form automatically for BizAid clients to use such as Khazanah and UEM.
- Used web automation technology such as iMacros .NET component.
- Get the data from MSSQL and use the data to fill up online forms.

Final Project

2015

E-Commerce – Online Flower Store

- Developed a responsive web-based application for selling flowers online.
- Integrated a small scale message system

2017

Complaint and Compound Management System

- Developed a robust web-based app for public to issue complaints and pay fine as well for staff to provide updates on the complaints received.
- Used Google Maps API to find a location and convert it to QR Code.
- Integrated Braintree Payment API
- Used Google Charts API for admin reporting
